

At IPCQ, we support, protect, defend, maintain & extend critical Australian infrastructure. We are a Queensland-owned and operated services provider with a nationwide reach. We provide coating removal, surface preparation, abrasive blast cleaning and protective coating services. Specialist corrosion prevention and maintenance can be performed in-situ on new and existing assets and infrastructure or at our specialised facility in Brisbane, Queensland.

IPCQ provide superior customer service by maintaining a continued focus on improving and extending the lifespan of our clients' assets by offering services and support throughout the complete asset life cycle. Particular emphasis is placed upon leadership, planning, support, training, workmanship, capability and quality. The Management of IPCQ attach major importance to determining client needs and expectations in addition to measuring how well these expectations are satisfied.

Our commitment is to excel in all aspects of the corrosion control industry incorporating excellence in project management, quality and safety performance while utilising sustainable techniques and technologies in accordance with the requirements of ISO 9001, ISO 14001, ISO 45001 and the CSIRO PCCP (Painting Contractor Certification Program).

IPCQ values the importance of meeting our clients' expectations, needs and requirements through the delivery of quality outcomes. A consistently successful approach is achieved through our commitment to maintaining a thorough Integrated Management System designed and implemented by Executive Management. Utilising knowledgeable and trained staff as well as the combined expertise of Directors, Managers and Supervisors IPCQ ensure that all work completed is regularly inspected and assessed against the highest standards.
