

CASE STUDY

THE GABBA

STADIUM ASSET PRESERVATION & STRUCTURAL COATING PROGRAM

Delivering structural coating and asset preservation works across The Gabba's critical stadium infrastructure, supporting long-term asset performance, corrosion protection and presentation standards within one of Queensland's premier sporting and entertainment venues.

PROJECT SNAPSHOT

CLIENT

Stadiums Queensland

LOCATION

The Gabba, Brisbane Queensland

SCOPE

Structural Steel Asset Preservation & Protective Coatings

VALUE

\$2.4 million + (Combined Program)

DURATION

2020 - 2026

PROJECT HIGHLIGHTS

LIVE OPERATIONAL STADIUM

THIRD-PARTY QA/QC COMPLIANCE

TRAFFIC & PEDESTRIAN MANAGEMENT

WORKING AT HEIGHTS

DAY & NIGHT SHIFT DELIVERY

ZERO SAFETY INCIDENTS

PROJECT DELIVERY

25+ PERSONNEL ONSITE

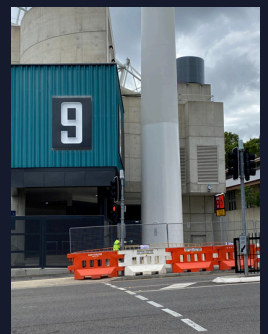

6-YR DELIVERY PROGRAM

3-COAT PROTECTION SYSTEM

\$2.4M+ STADIUM PROGRAM

Structural coating and presentation upgrade works completed across The Gabba Stadium asset preservation program.

YOUR PARTNER IN SAFE, EFFECTIVE & QUALITY CORROSION CONTROL SERVICES

MAINTAINING CRITICAL STADIUM INFRASTRUCTURE

IPCQ has delivered multiple structural coating and asset preservation projects across The Gabba between 2020 and 2026. Working within a live sporting and entertainment venue, IPCQ provided corrosion control, protective coating and presentation improvement works to key structural elements while maintaining safety, public access and operational continuity.

01

THE CHALLENGE

The works required corrosion remediation and protective coating application across highly visible structural steel elements within a live stadium environment.

- Maintaining public and contractor safety within an operational venue
- Working at heights using EWP's and scissor lifts
- Managing pedestrian and traffic interfaces
- Coordinating day and night shift operations
- Achieving strict third-party QA/QC requirements
- Delivering works within tight project deadlines

02

IPCQ SOLUTION

IPCQ implemented a staged delivery approach that enabled structural coating works to be completed safely while maintaining venue operations and presentation standards.

- Detailed planning and stakeholder coordination
- Spot corrosion treatment and localised steel remediation
- Application of 3-coat protection systems
- Elevated access solutions for structural steelwork
- Day and night shift delivery to suit operational requirements
- Third-party QA/QC inspections and hold points

03

OUTCOME

IPCQ successfully delivered multiple structural coating projects that improved asset presentation, corrosion protection and long-term durability across The Gabba precinct.

- \$2.4M+ of works delivered across multiple projects
- Improved appearance of highly visible stadium infrastructure
- Long-term corrosion protection outcomes achieved
- Third-party QA/QC requirements satisfied
- Safe delivery within a live stadium environment
- Ongoing trusted contractor relationship
